Good Housekeeping Practices for... **AUTO MAINTENANCE, REPAIR, and FUELING OPERATIONS**

**Control Stormwater Runoff Pollution...
Protect the Delaware Estuary and its Streams and Rivers**

Be a **Clean Water Partner** by preventing stormwater runoff pollution from your site. Controlling stormwater pollution can be simple and inexpensive. Preventing stormwater pollution from occurring is certainly less costly than cleaning up water pollution after the fact. Preventive measures include common sense good housekeeping practices for the outdoors like sweeping regularly to remove silt, sand, and litter from your parking lot, covering dumpsters, and controlling salvage, scrap and wastes stored outside. Clean up or treatment to remove pollutants already in stormwater runoff or stream water are more costly, and generally less effective.
